SKILLS

Languages: Java, JavaScript, C, TypeScript

Core concepts: Object-oriented programming, data structures and algorithms, multithreading and concurrency, socket programming

Backend: Spring Boot, Spring Data JPA, REST APIs, JUnit, Maven

Databases: SQL, PostgreSQL, MySQL, H2 — schema design, transactions, locking, query tuning

Web and tools: HTML, CSS, Git, Linux, Docker, Swagger/OpenAPI

PROJECTS

Banking Management System, REST API for accounts and transfers *Java 17, Spring Boot 3, PostgreSQL, JPA*

- **Built a 10-endpoint REST API** for account creation, deposits, withdrawals, transfers, and transaction history using a controller/service/repository architecture, Bean Validation, and centralized exception handling.
- **Implemented concurrency-safe balance updates** with JPA PESSIMISTIC_WRITE row locking and consistent lock ordering for transfers to prevent lost updates and deadlocks.
- **Validated concurrency with a PostgreSQL integration test** running **1,000 concurrent deposits across 20 threads**, verifying the expected $10,001 balance and 1,001 transaction records.

Multithreaded Web Server, concurrent TCP client-server in Java *Java, Sockets, Multithreading, ExecutorService*

- **Built a TCP server on Java ServerSocket** that accepts connections in a loop and dispatches each one to a worker thread for concurrent client handling.
- **Replaced thread-per-client with a fixed ExecutorService pool** after testing with 20 simultaneous clients, bounding thread creation under load.
- **Managed blocking I/O and per-request connection cleanup**, and documented the scaling limits of thread-per-client in a write-up.

POSITIONS OF RESPONSIBILITY

Computer Engineering Society, Siliguri Institute of Technology Mar 2025 – Jan 2026
Technical Team Lead (from Aug 2025), previously Junior Associate

- **Ran a 45-day DSA challenge**, managing daily problem releases, timed locks, and participant progress throughout the challenge.
- **Coordinated the technical team** through planning meetings, event preparation, and day-to-day technical issues, working with team members to keep events on schedule.
- **Managed the technical side of Industry Connect: Campus 2 Corporate**, a 5-day simulation for **150+ students**, coordinating data collection, result tabulation, and scoring across rounds.
- **Hosted and anchored hackathons with 40+ teams**, while mentoring 5 teams and holding clarification meetings; **promoted** from **Junior Associate** to **Technical Lead** in **five months.**

ACHIEVEMENTS AND WRITING

- **First runner-up out of 10+ teams** at SIT Master Presenter 2026, building the case and slides on Rapido and delivering the presentation.
- **First place in CODE BITES 5.0**, a coding contest with **70+ participants**.
- **195+ problems solved** on LeetCode, contest rating **1545**.
- Oracle Java Foundations, Java Explorer badge, scored **100%**.
- **Technical writing on** Medium, including the Rapido business case and the scaling limits of thread-per-client servers.

EDUCATION

B.Tech Computer Science and Engineering, Siliguri Institute of Technology (MAKAUT) 2023 – 2027 · CGPA 7.58

ISC, St. James School, Binnaguri 2023 · 74.75%

ICSE, Sarwan Memorial School, Banarhat 2021 · 82.75%

Interests: Chess, basketball, reading on technology and markets.
