TECHNICAL SKILLS

Languages: Java, C, JavaScript
Backend: Spring Boot, REST APIs, JDBC, OOP, Collections, Multithreading, ExecutorService, Socket Programming
Databases: MySQL, PostgreSQL
Testing: JUnit
Tools: Git, GitHub, Maven, IntelliJ IDEA, Linux
Concepts: Data Structures and Algorithms, DBMS

PROJECTS

Banking Management System | Java, MySQL, JDBC, JUnit

- **Built** a console banking system in Java covering **7 operations**: registration, login, account opening, balance check, deposit, withdrawal and transfer.
- **Designed** a **2-table** MySQL schema for users and accounts, with a **4-digit** PIN check on every transaction.
- **Used JDBC prepared statements** with **commit and rollback** so a failed transfer never leaves two accounts out of step.
- **Split** the code into **5 classes** and **tested 10+ transaction scenarios** with JUnit.

Multithreaded Web Server | Java, TCP sockets, ExecutorService

- **Built** a TCP client-server application using Java sockets, with two-way communication between client and server.
- **Used a fixed thread pool** through ExecutorService to **serve multiple clients concurrently** on a single port (8010), instead of **1 thread per connection**.
- **Worked with blocking I/O**, Runnable and lambda-based task submission, and **documented** the setup in the README.

Ticket Booking System | Java, OOP, Collections, File I/O

- **Built** a console train booking system in Java with login, train selection and seat booking across **3 routes** of **5 seats** each.
- **Persisted bookings to file** and **reloaded** them on startup, so seats booked in an earlier run stay unavailable.
- **Structured** the code into **entity and service layers** using OOP, with booking logic isolated in a single service class.

POSITIONS OF RESPONSIBILITY

Computer Engineering Society, Siliguri Institute of Technology — Mar 2025 to Jan 2026 (11 months)
Technical Team Lead for 6 months *(Aug 2025 to Jan 2026), previously* ***Junior Associate for 5 months***

- **Led a 45-day** Data Structures and Algorithms challenge for the society and **evaluated and guided** participation.
- **Organized and hosted** hackathons drawing **40+ teams (160+ participants)**, plus Industry Connect sessions attended by **150+ students**, including **speaker and sponsor outreach**.
- **Maintained registration and attendance records** for these events.

ACHIEVEMENTS

- **1st place**, CODE BITES 5.0 coding competition, **70+ participants**, at SIT.
- **195 problems solved** on LeetCode, contest rating **1545** (handle: Nimesh891).
- Oracle Java Foundations, Java Explorer badge, scored **100%**.
- **1st runner-up out of 10 teams**, SIT Master Presenter 2026.
- **Write on Medium** about Java and backend topics.

EDUCATION

B.Tech Computer Science and Engineering, Siliguri Institute of Technology (MAKAUT)	2023 to 2027 | CGPA 7.58/10
ISC, St. James School, Binnaguri	2023 | 74.75%
ICSE, Sarwan Memorial School, Banarhat	2021 | 82.75%

INTERESTS

Chess, basketball (winner, Inter-Department Basketball Competition 2026 at SIT), and reading on technology and markets.
